

Bloc Hotel

The project involves the construction of 22 storey concrete frame on basement raft foundations within busy city centre location adjacent Birmingham New Street station.

MSAFE Risk Management supported Brightspace Architects with their role of Principal Designer during a Pre-Contract Service Agreement to undertake the design up to commencement of RIBA Stage 5. MSAFE supported the team through:

- Attendance at design meetings and facilitating design review meetings including maintenance access reviews
- Presenting to the client on their duties and how they will be met on the project
- Development of CDM Pre Construction Information
- Design team meetings
- Assistance with development of the health and safety file
